Canola Canola Plus

Phos Boost for Your Canola

NEXT GENERATION FERTILIZER

Designed in Canada for Canadian Farmers 

1-844-269-3276 | AgraCity.com

Designed to meet the nutritional needs of canola grown in Canada

BENEFITS OF USING MICROPHOS CANOLA AND CANOLA PLUS:

- Same technology as our proven MicroPhos MicroPack ensuring maximum use efficiency of applied phosphorous.
- Boron support for flowering and seed set for exceptional crop yields.
- Season-long nourishment with elemental and sulphate sulphur for high demand canola crops.

GUARANTEED ANALYSIS:

MicroPhos Canola: 10N-29P-0-22S + B

MicroPhos Canola Plus: 10N-25P-0-25S + B

COMMON USES & RATES

The innovations in MicroPhos allows more impact from each granule. Match your current product rate with our chart suggested application rate.

TARGET LB P/AC	MAP	S15	MICROPHOS CANOLA
20	38	61	45-50
25	48	76	55-60
30	58	91	65-70
35	67	106	75-80
40	77	121	85-90

MicroPhos Canola and Canola Plus powered by Power-Phos, surrounds the phosphorous granule in a water-soluble negatively charged “shield”. The Power Phos shield attracts and binds the ions that tie up phosphorus making it more available to your crop.

AgraCity’s newest and most advanced fertility product line now available to the Canadian farmer. With Power Phos technology, it is a real game changer in getting the most out of your phosphorous dollars by providing your crop with everything it requires to maximize yields. **MicroPhos** is the next generation of fertilizer, made by Western Canadian farmers, for farmers.
