# MicroPhos 49 provides your crop with everything it requires to maximize yields.

## BENEFITS OF USING MICROPHOS 49:

- Proprietary blend of plant growth regulators encouraging root growth
- Micro-nutrients critical for root development, nitrogen utilization, and pulse nodulation.
- Micro-nutrients to address zinc, boron and other common deficiencies found in the soil.
- Uniform distribution of nutrients.
- Screened and treated to improve handling and exceed expectation.

ZINC deficiency in PEAS

BORON deficiency in CANOLA

## GUARANTEED ANALYSIS:

11N - 49P - 0 - 2S - .25 Zn, Cu, Mn, B + 1/4 Rate Power Phos + PGRs

**MicroPhos 49** surrounds the phosphorous granule in a water-soluble negatively charged "shield", attracting and binding the ions that tie up phosphorus - making it more available to the crop - while sulfate lowers the pH around the granule increasing phosphorus availability.

AgraCity's newest and most advanced fertility product line now available to the Canadian farmer. With Power Phos technology, it is a real game changer in getting the most out of your phosphorous dollars by providing your crop with everything it requires to maximize yields. **MicroPhos** is the next generation of fertilizer, made by western Canadian farmers, for farmers.
