

MPOWER[®] EXTRA[®]

WHY USE MPOWER EXTRA?

- Same active as Express
- Enhanced pre-seed control of dandelion, narrow-leaved hawk's-beard, flixweed, stinkweed and shepherd's purse
- Controls or suppresses 26 broadleaf and grass weeds when mixed with glyphosate (all types)
- Flexible cropping options if applied in early fall prior to spring seeding
- Use in all soil zones
- Multiple modes of action
- Tank mix with any glyphosate
- Great pre-seed option ahead of **Aurora[®]** or **Hellcat[®]**
- Best value and best price for pre-seed weed control

USE ON

- Spring wheat, durum wheat, barley

WEEDS CONTROLLED

(when mixed with glyphosate acid equivalent at 0.5 L/acre (360 gm a.i./L))

Weeds up to 8 cm

- Canada fleabane
- Common ragweed
- Narrow-leaved hawk's beard

Weeds up to 3 leaf

- Cow cockle
- Wild buckwheat

Rosette

- Canada thistle³

Weeds up to 15 cm

- Dandelion
- Downy brome
- Flixweed
- Giant foxtail
- Green foxtail
- Hemp-nettle
- Kochia¹
- Lady's thumb
- Lamb's-quarters
- Persian darnel
- Redroot pigweed
- Russian thistle
- Stinkweed
- Volunteer barley
- Volunteer canola²
- Volunteer flax
- Volunteer wheat
- Wild mustard
- Wild oats

¹ Not including group 2 & 9 resistant biotypes

² Including all HT varieties

³ Suppression

SAME ACTIVE AS EXPRESS® Tribenuron Herbicide

REQUIRED SURFACTANT

- None required when mixed with glyphosate
- If used alone Icon™ or Agral® 90 at 2 L per 1000 L water

ACTIVE INGREDIENT

Tribenuron-Methyl 75% dry flowable (DF)

PACKAGE SIZES

- **Case:** 80 acres

WHEN TO APPLY

- One day prior to seeding

WATER VOLUME

- 5-10 gallons/acre

RAINFAST PERIOD

1 hour

RE-CROPPING OPTIONS

- **2 months after application:** canola, flax, lentils, alfalfa.
- No restrictions the following crop year

SUPPORTED TANK MIXES*

Disruptor® 360 or 540 glyphosate

STORAGE

Product can be frozen

GRAZING AND HARVEST

- No grazing restrictions
- No pre-harvest interval for registered crops

MIXING INSTRUCTIONS

1. Fill the spray tank 1/2 full of clean water, begin agitation and continue throughout mixing and application process.
2. Add the required rate of **MPower Extra** and agitate until product is fully dissolved.
3. Add the required amount of glyphosate.
4. Add required amount of surfactant if needed, then complete filling tank with balance of water and apply.
5. Product must be applied within 24 hours in order to remain effective

UNDERSTANDING PERFORMANCE

- Use 50 mesh or larger screens in spraying equipment.
- Optimum control will occur during warm moist conditions when weeds are actively growing.
- For best results, ensure thorough spray coverage of target weeds, use higher water volumes for heavier weed pressure.
- Weeds hardened off by cold weather or drought stress may not be adequately controlled or suppressed and regrowth may occur.
- Application to crops that are stressed by severe weather conditions, frost, low fertility, water-logged soil (soil at or near field capacity), disease or insect damage may result in crop injury. Drought, disease or insect damage following application may also result in crop injury.
- Do not use on highly variable soils that have large gravelly or sandy areas, eroded knolls, calcium deposits, or organic matter less than 3% as risk of crop damage will increase.
- Product effectiveness will be reduced if left in the sprayer for more than 24 hours after mixing.

Always read and observe all label directions including rates, restrictions, and grazing and harvest limitations.

*Supported by AgraCity under PMRA tank mix guidelines. When applying tank mix combinations, read and observe all label directions for each product used in the tank mix, and follow the more stringent label precautionary measures for mixing, loading and applying stated on both product labels.
